

I'm a leader with a blend of broad technical expertise and customer-first product vision. I have a proven record of building diverse, inclusive, and empathetic teams that deliver exceptional quality products quickly.

Experience in Node, React, Swift, Kotlin, Ruby, Go, Java, Python, Ember, Backbone, PHP, Perl, Objective-C.

## **Professional Experience**

**06/2015 - 01/2020** Director of Technology, [NYT Cooking](#); [The New York Times](#)

I led NYT Cooking's 25-person cross-platform engineering team. I was responsible for long-term technical strategy, scaling and restructuring the engineering organization as needed, and fostering an inclusive, empathetic, high-performing, and growth-first team culture. During my tenure, we built the paywall infrastructure to transition into a \$20 million subscription product, scaled the organization and product into several new platforms, and delivered an unparalleled customer experience winning two Webby awards and the 2019 James Beard award for *Publication of the Year*.

In addition to my role in NYT Cooking, I was also passionate about making The New York Times and industry-leading engineering organization. I helped improve and promote diversity as a founding member of the "Women In Tech" taskforce, partnered with our recruiting team to reimagine our engineering hiring process, and helped foster a remote-first culture as the company's most senior engineering leader.

**03/2014 - 05/2015** Senior Web Developer; [Google, Inc.](#) ([Nest Labs, Inc.](#) acquired by Google, Inc.)

I managed a team of 5 full-stack engineers responsible for widgets.nest.com and support.nest.com. As a small yet highly effective team, we supported the launch of three new Nest products and the company's international expansion into Europe.

**02/2013 - 12/2013** Director of Engineering; [The New Yorker](#)

I served as The New Yorker's first-ever Director of Engineering. I built a dedicated tech team of 8 web and native engineers responsible for newyorker.com, multiple native iOS applications, and numerous internal publishing systems. My team rearchitected and simplified the editorial production process, launched the Webby award-winning redesign of newyorker.com, and laid the foundation for The New Yorker's Paywall.

**09/2011 - 02/2013** Lead Engineer, barackobama.com; [Obama for America](#)

I managed a team of 5 full-stack engineers responsible for voter persuasion and outreach of the most significant Presidential campaign website in history, with over 350 million page views.

## **Education**

2005 - 2007	<b>Berklee College of Music</b> ; Certification, Music Technology and Production
2001 - 2005	<b>Florida State University</b> ; Bachelor of Science (BS) Information Studies
